

AWARDS **FAST** car 2010

TUNING

HIGHLY COMMENDED Turbo Technics

Turbocharged engines are exciting, but tuned turbocharged engines are even better! I no lie. Turbo Technics have got tonnes of turbo experience and produce some of the sweetest boost makers we've ever seen. With their superb service and big stock they get a Highly Commended-type thumbs-up.

HIGHLY COMMENDED Powertec

The sweet looking SL-1 induction kit from Powertec packs a fine aluminium spun base with a super high-flowing stainless steel mesh filtration. Their monstrous fitment range and great price tag makes this a lovely core product that will really benefit your motor.

FAST AWARDS 2010

WINNER

Forge Motorsport

Pride. That's what every product that comes out of Forge Motorsport has got stamped all over it. Not literally, of course. But when Forge drops a new product into the market, you can almost smell the passion they put into it. Anyway, less of my chat; this kit is good. Dump valves, stunning Front Mount Intercooler kits or just shiny parts - Forge has got the lot. They blew our minds at Autosport with their top-quality products fitted to Nissan's epic GTR and we would like to show wild appreciation for that. Forge, you win. The end.

Tuning

This category is big! And I don't just mean it's a mega-important one to win... I'm saying there are a lot of products in the tuning market and choosing the shortlist was tough, but the Highly Commendeds and Winner was proper hard! Tuning your car should make it run sweeter, go faster and even look cooler. Here's who's smashing the boundaries...
