WORTHERSEE

The world's largest VW gathering takes place in the picturesque Austrian village of Reifnitz on Lake Worthersee. At over 700 miles from Calais, it's a proper mission to get there, but so worth it. This year, our friends at Forge Motorsport teamed up with Revo and Awesome GTI to convoy across Europe to represent the best the UK has to offer. With a selection of tuned VAG metal including Forge's own Scirocco and a stunning, big power TT RS, they did us proud! The show takes

place in a small village, where every last inch of space is taken up by tuned metal. Driveways, grass verges – you name it. The show is supported by some big VAG manufacturers including Audi, VW, Skoda and SEAT, that all develop cars especially for the show. This year there were some more stunning cars on display, plus thousands of tuned cars from all over Europe that came to join the party. Huge thanks to Pete and the guys at Forge for sending us this report. Same time next year chaps?

The UK contingent

Pete from Forge went native.... oh dear!
